Mert Eyüboğlu

This week, we are informed on Wednesday (9th of September) by our DS coordinator that our weekly meeting time is Wednesday morning thus we couldn't meet with our DS coordinator as a group this week. We have attended the Engineering Design I seminar on Wednesday. This seminar was about the concept generation, design tools, and problem-solving techniques. Between Wednesday (9th of September) and Friday (11th of September), we complete our business proposal report. The report is written with the collaboration of all company members. This report was submitted to Github, EE493-Revolusys group, on Friday. In this report, we prepared a work schedule from the submission date of the business statement report to the submission date of the proposal report. As stated in this schedule, company members had their own researches on the projects and a meeting was made on Monday (14th of September). In this meeting, a brainstorming activity was performed. The efficiency of the meeting was low. We decided to make deeper research on solutions to problems and a meeting on Thursday (17th of September) or Friday (18th of September). There will be a meeting with the DS coordinator and a seminar on Wednesday (16th of September).
